Art Unit: 1775

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 8 recites the broad recitation CVD, and the claim also recites plasma CVD which is the narrower statement of the range/limitation.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1775

3. Claims 1,6, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Esumi et al (6,302,665).

Esumi et al discloses the claimed PVD CrN coating on a piston pin through a white layer (column 13, line 29-30). The claimed doping is considered inherent.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 5,6,8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Esumi et al (as above) in view of Ogawa et al (6,232,003) or Miyazaki et al (5,582,414)

Esumi et al discloses the invention as claimed except for the explicit disclosure of doping. Both Ogawa et al or Miyazaki et al discloses the known technique of doping CrN coating to improve friction properties.

Thus it would have been obvious to one of ordinary skill in the art to provide the CrN coating of Esumi et al with a dopant, as this addition is known to improve the properties of the coating, as shown by Ogawa et al or Miyazaki et al.

It is also known in the friction coating art to provide a friction coating as smooth as possible to improve its friction properties.

6. Applicant's arguments with respect to claims 1,5,6,8 have been considered but are moot in view of the new ground(s) of rejection.
